

Combining expertise and understanding

We've been helping our customers to identify, manage and control engineering business risks for over 80 years. We have a nationwide team of up to 500 highly trained and experienced engineer surveyors.

An individual approach

We understand that all businesses are different, so we take an individual approach and tailor our solutions. We have the knowledge and experience to deal with all aspects of engineering risk as they apply to your business, and will work with you in the way that suits you best.

Investing in people

We invest heavily in training to maintain our engineer surveyors' levels of technical expertise. This includes using the latest online technology to assess our staff and to identify training needs.

We regularly assess and audit our technical staff to ensure that their understanding of key technical and health and safety matters meets our exacting standards. We've established a benchmark for our engineer surveyors and ensure that all of our people are above it.

Harnessing technology

Our engineer surveyors use some of the latest technology when they carry out inspections. For example, their Toughbook laptops allow them to generate reports while they are at your site, resulting in faster, higher quality reports.

The Toughbooks also contain our technical manuals, health and safety procedures and special customer instructions. This comprehensive library of information means that if a technical issue arises during an inspection our engineer surveyors have the answers immediately to hand.

Advice you can trust

We are a Type A (fully independent) UKAS* accredited inspection body and are entirely removed from the manufacture, operation or maintenance of plant. You can therefore be confident that our advice is always independent and objective.

Our technical services team are on hand to discuss any issue a customer might have. These are senior engineers with a vast amount of engineering experience combining industry expertise as diverse as marine, nuclear, petrochemical and mining.

Instant access to engineering reports

Our online reporting tool Crimson gives you instant access to your reports and to management information on our inspection activity wherever and whenever you need it.

It also allows you to see dates for upcoming inspections – so you can plan shutdowns and maintenance work to cause minimum disruption to your business.

* United Kingdom Accreditation Service

Finding out more

If you'd like to find out more about how we can help you with statutory inspections and other areas of engineering risk, please speak to your broker or usual Zurich contact.

Zurich Engineering, Park House, Bristol Road South, Rubery, Birmingham B45 9AH
