

Zurich HelpPoint[®]

Home Contents Calculator

It is easy to under-estimate how much your belongings are worth. That is why we have provided this helpful home contents replacement cost calculator. It will help you to arrive at an estimate of how much contents cover you may need. Remember that the sum insured / cover you choose should represent the full replacement value of all of your contents in the home. Items such as jewellery and watches may require a separate valuation.

The best way to do this is to complete the following room list with everything you have in and around your home. Be sure to include things you have made as well as anything that has been given to you because these things will need to be replaced too. You are able to type your answers into this calculator and save it onto your computer at any point while you are completing it by clicking the "Save" button on the forms.
