

The Pressure Systems Safety Regulations 2000 -2025

Online training Course dates: 11/02/2025, 13/05/2025, 12/08/2025, 11/11/2025

Description

The Pressure Systems Safety Regulations apply to most pressure plant used at work. It is important that anyone who has involvement in the operation or maintenance of pressure systems is aware of their duties and responsibilities. The course explains the legislation and also where it interfaces with the Pressure Equipment Regulations. It also addresses the Approved Code of Practice and Guidance Notes associated with the legislation. Users will be given a general understanding of the regulations, explaining their responsibilities and the scope of the regulations.

Aims

Learn how the Pressure Systems Safety Regulations affect new construction, repairs, maintenance, operation, providing a Written Scheme of Examination and examination of pressure systems.

Course Content

- Introduction
- Historical background
- Flixborough Disaster – Video and background
- Scope of legislative package
- Definitions
